## INTRODUCTION

Congratulations on your purchase and welcome to Woodland Mills! This manual gives you the necessary information about your Woodlander<sup>®</sup> sawmill trailer so you will be able to use it properly. The entire manual must be read and understood before using the trailer. If any questions should arise that are not covered by this manual, please contact Woodland Mills, Inc.

OWNER'S RECORD
Please take a moment to record the following information about your Woodlander® sawmill trailer. If you need to call for assistance, please be ready to provide your model and serial numbers. This information will allow us to help you more quickly when you call.
MODEL NUMBER
SERIAL NUMBER
DATE OF PURCHASE

The Woodlander® sawmill trailer is compatible with HM126, HM130, HM130MAX®, & HM136MAX™ sawmill and track systems for milling logs while the trailer is stationary and firmly supported on the ground. It is not intended to carry any additional weight or be used as a utility trailer.

The Woodlander® sawmill trailer is sold as <u>off-road only</u> trailers designed for certain applications. We strongly recommend the trailer not be modified and/or used for any application other than that for which it was designed. If you have any questions relative to a particular application, DO NOT use the trailer until you have first contacted Woodland Mills to determine if it can or should be performed using the product.

For technical questions and replacement parts, please contact Woodland Mills, Inc.

## **GENERAL SAFETY RULES**

## **WARNING!**

Read and understand all instructions. Failure to follow all instructions listed below may result serious injury.

## **WARNING!**

The warnings, cautions, and instructions discussed in this instruction manual cannot cover all possible conditions or situations that could occur. It must be understood by the operator that common sense and caution are factors which cannot be built into this product but must be supplied by the operator.

## **WARNING!**

The trailer is not designed to carry any additional weight other than the sawmill and trailer itself while being towed. Failure to heed this warning could result in damage to the trailer and/or the sawmill.

Damage caused by towing additional weight will void the warranty.

# **WARNING!**

The Woodlander® sawmill trailers are designed and sold as off-road trailer packages and are recommended for this type of use. While they include some road safety components, every province, state, and country have unique regulations that need to be met for road-worthiness. It is important to comply with all regional regulations if attempting to convert the trailer for road use.

# INSPECTION/MAINTENANCE

- Check the tires before all trips. Make sure they are inflated to the pressure shown on the tire.
- Grease the axle bearings every 3 months or 1000 miles [1600 km], whichever comes first.
- Check the tow hitch ball coupler. Make sure it is not damaged.
- · Check the wheel lug nuts before all trips. Make sure they are torqued properly.
- Check the lights. Make sure all the lights work properly. Replace any lights that do not work.
- Inspect trailer before all trips for any damaged or loose parts.

# **TECHNICAL SPECIFICATIONS**

Item	Specification
Trailer Axle	Independent Torsion Axle Design
Trailer Wheels	5 Bolts @ 4.5 in [114 mm] & 175/80R13 Approved Tires
Tire Pressure	Refer to Tire
Wheel Nut Torque	80 ft•lb [110 N•m]
Trailer Ball Coupler	2 in [50 mm]
Trailer Lights	LED Light Kit (stop, turn, tail, side markers, and license plate light)
Finish	Powder Coat Paint / Galvanized Steel
Fenders	Removable
Safety	Locking pins and safety straps to secure sawhead while travelling
Shipping Weight	846 lb [384 kg]
Product Weight	782 lb [355 kg]

## **BOLT TORQUE SPECIFICATIONS**

Bolt (Thread Size)	Torque
M5	78 in•lb [9 N•m]
M6	133 in•lb [15 N•m]
M8	333 in•lb [38 N•m]
M10	53 ft•lb [72 N•m]
M12	93 ft•lb [126 N•m]

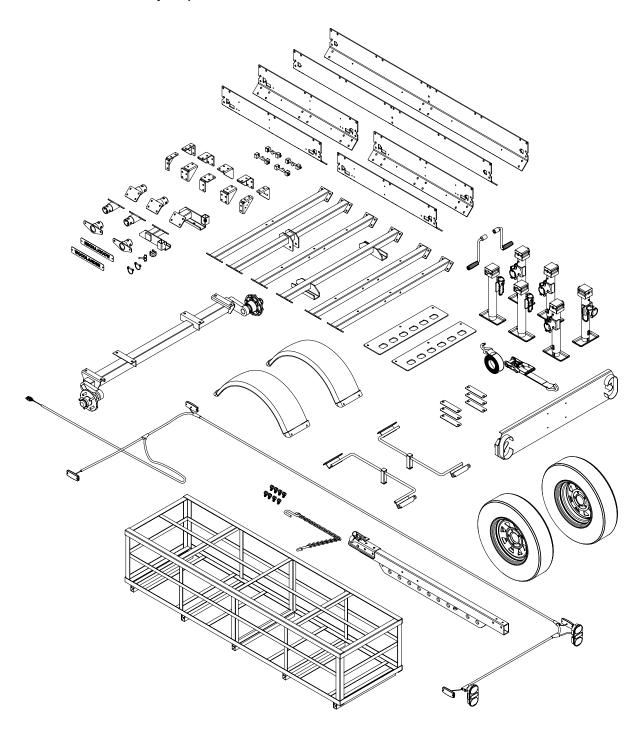

# **BOLT TORQUE WARNING!**

The torque specifications listed above apply only to the track and trailer assembly outlined in this manual. They do <u>not</u> apply to the sawmill assembly. Follow the instructions in the sawmill operator's manual when assembling the carriage and sawhead.

# **UNPACKING**

Remove all the parts from the steel crate. Set the crate aside as it will be used as a support for several of the assembly steps.

# **COMPONENT LISTS**

Verify all component and hardware quantities are correct prior to assembling the trailer.

4x	End Gusset [0001373]		4x	Jack Mount [0001376]	
6x	Joining Gusset [0001374]		2x	Bushlander Jack Mount [0002249]	
2x	Long Side Plate [0008948]	9	6x	Swivel Jack [0006798]

- \* M12 X 1.75 X 70 mm Hex Bolts not applicable on European trailers
- \*\* M12 X 1.75 X 100 mm Hex Bolts not applicable on North American trailers
- \*\*\* M5 X 0.8 X 20 mm Phillips Pan Head Screw quantity 12x on European trailers

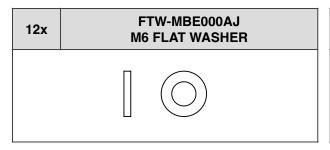

#### **SCALES**

Ruler scales are also provided below to double-check bolt and screw lengths when necessary.

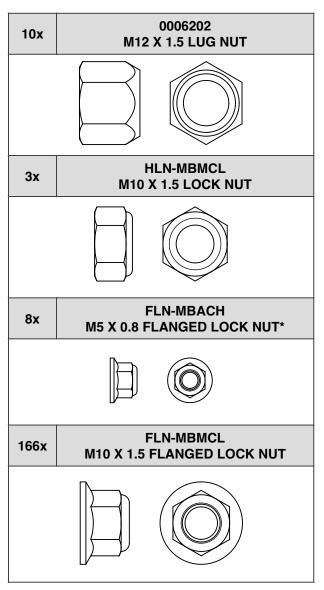

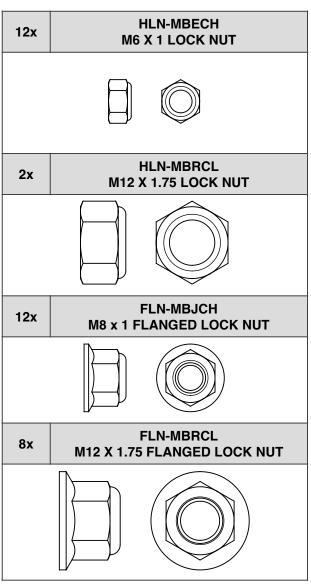

#### **WASHERS**

### **NUTS**

<sup>\*</sup> M5 X 0.8 Flanged Lock Nut quantity 14x on European trailers

## **SAWMILL COMPONENTS**

These components from the sawmill are required to build the trailer. They do not ship with the Woodlander® trailer.

4x	Track Rail [0001073]	
2x	Reinforcement Plate [0001072]	
4x	Carriage Stop [0001055]	
4x	Anti-Tip Rail [0003620]	

3x	T-Bolt M10 X 40 mm [0001059]	
2x	End Bunk [0003606]	
3x	Log Bunk [0009120]	FILE

## SAWMILL HARDWARE

None of the hardware from the sawmill is used to build the trailer.

# **TRAILER ASSEMBLY**

# 1. TOOLS REQUIRED

Tool	Specification
Phillips Head Screwdriver	No. 3
Wrench/Socket	8 mm
Wrench/Socket	9 mm
Wrench/Socket	10 mm
Wrench/Socket	13 mm
Wrench/Socket	14 mm
Wrench/Socket	15 mm
Wrench/Socket	18 mm
Adjustable Wrench	Variable
Torque Wrench	Capable of 93 ft·lb [126 N·m]
Drill	Corded or cordless

### 2. GUSSETS

Using the hardware listed below, assemble the gussets to the track as shown on the next page.

Ensure the track width is set correctly (see track widths on next page), and measure diagonally to check for squareness. Torque all bolts per the table in section, **BOLT TORQUE SPECIFICATIONS**.

24x	M10 X 30 mm Flanged Hex Bolt	2x	Reinforcement Plate	
8x	M10 X 40 mm Flanged Hex Bolt	4x	End Gusset	
32x	M10 Flanged Lock Nut	6x	Joining Gusset	
2x	End Bunk	4x	Track Rail	
Зх	Log Bunk			

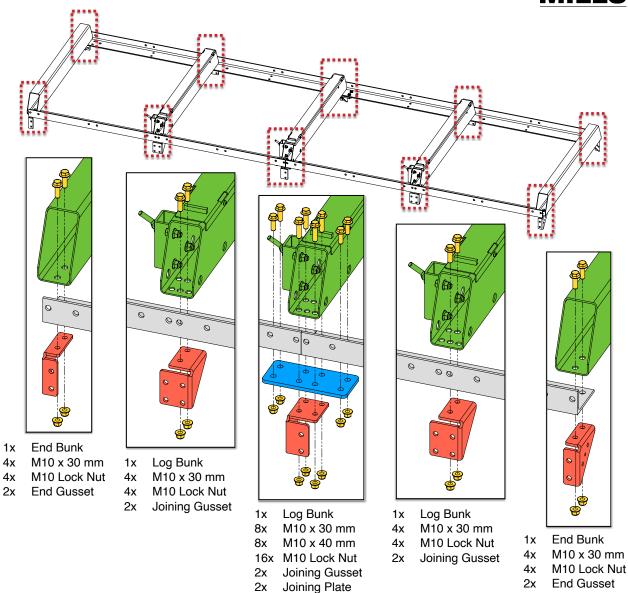

Track components listed in these tables are *not* included with the trailer package, namely track rails, reinforcement plates, bunks, and carriage stops. These components are found in the sawmill crate. If the trailer was purchased for an existing sawmill (i.e. the sawmill is currently assembled), the track will need to be disassembled prior to building the trailer and the following assembly instructions performed.

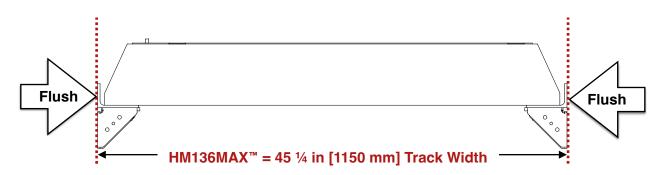

Use the fasteners included with the sawmill trailer to assemble the track. The fasteners included with the sawmill track will *not* be used.

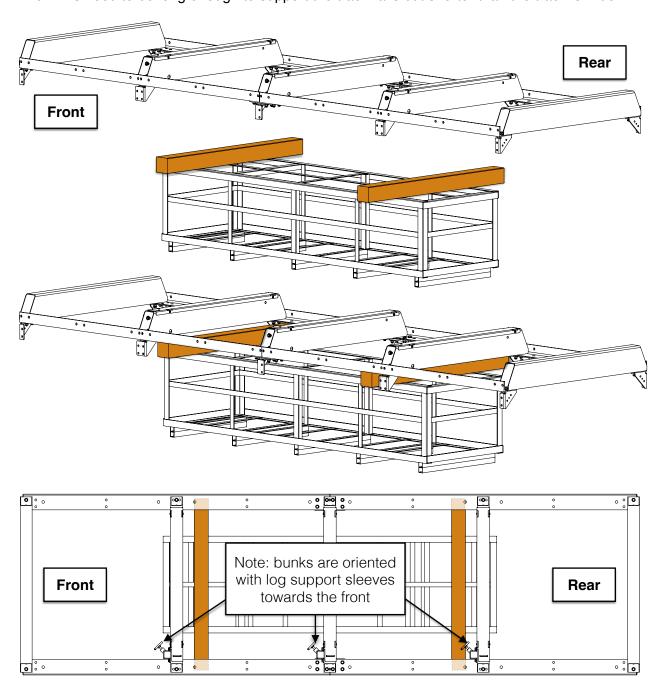

The above steps need to be completed on both left and right sides of the track. Make sure the gussets are flush with the outside face of the track rails as shown below.

## 3. SIDE PLATES

Using the shipping crate as an assembly aid, lay two (2) 4X4s across the top the crate near each end. Position the track/gusset assembly on the 4X4s, ensuring it is centred end-to-end. The 4X4s need to be long enough to support the track rails but shorter than the track is wide.

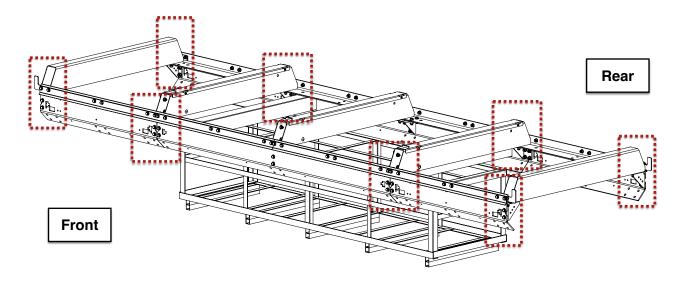

Use 43 in [1092 mm] long 4X4s.

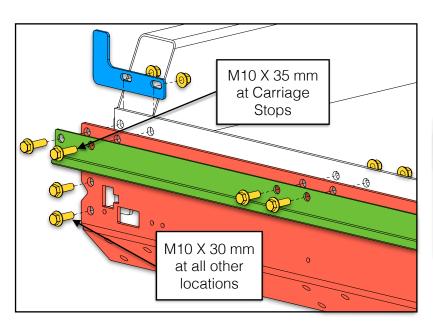

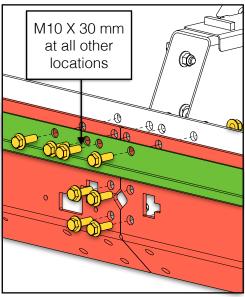

Using the hardware listed below, hang the side plates and the anti-tip rails using the M10 X 30 mm and M10 X 35 mm bolts. The anti-tip rails are from the sawmill crate. Do not tighten these bolts. The eight (8) M10 X 35 mm bolts are used with the carriage stops. The M10 X 30 mm bolts are used everywhere else.

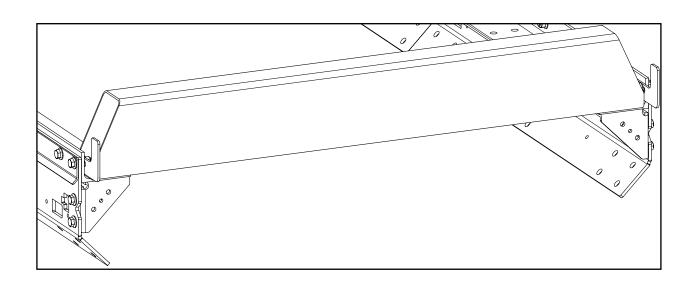

68x	M10 X 30 mm Flanged Hex Bolt	4x	Short Side Plate	
8x	M10 X 35 mm Flanged Hex Bolt	4x	Anti-Tip Rail	
76x	M10 Flanged Lock Nut	4x	Carriage Stop	
2x	Long Side Plate			

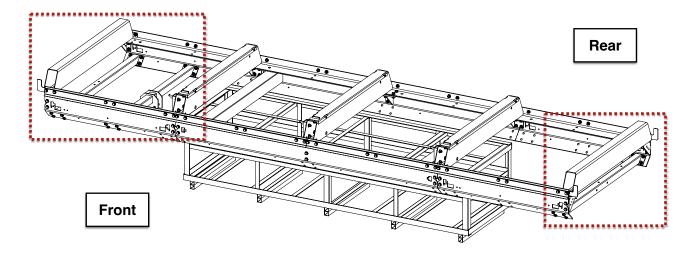

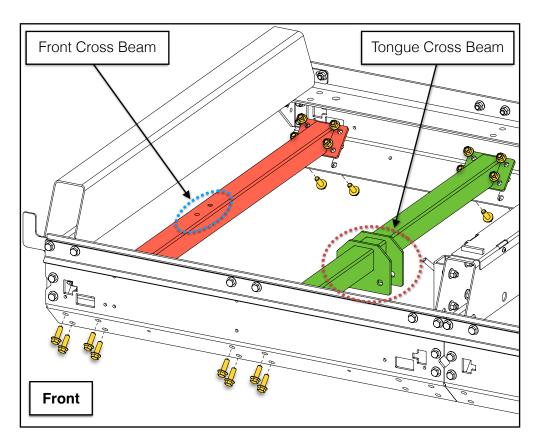

# 4. FRONT AND REAR CROSS BEAMS

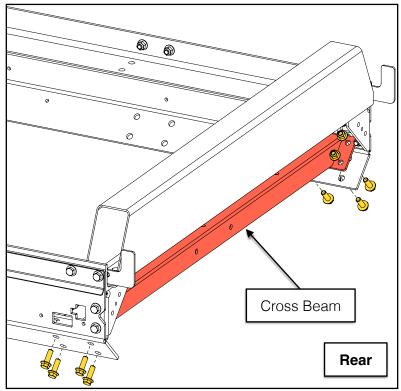

Using the hardware listed below, install the front and rear cross beams (2 front, 1 rear). Ensure the cross beam with the two holes is assembled at the front. Do not tighten these bolts.

24x	M10 X 30 mm Flanged Hex Bolt	1x	Front Cross Beam	
24x	M10 Flanged Lock Nut	1x	Tongue Cross Beam	
1x	Cross Beam			

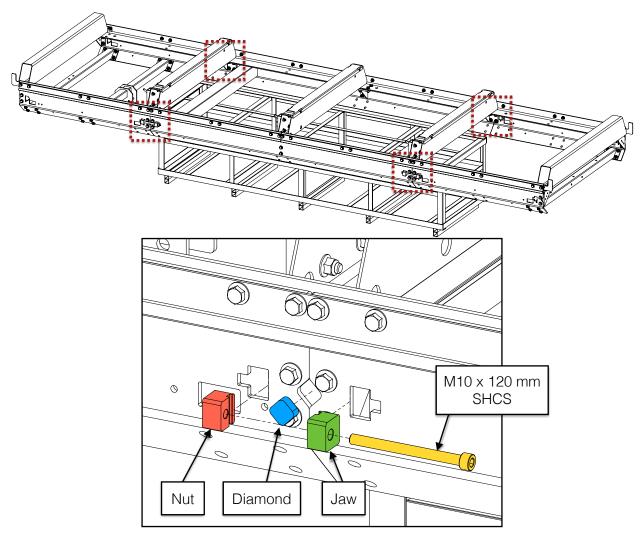

# 5. SIDE PLATE-TO-RAIL OFFSET & BOLT TORQUING

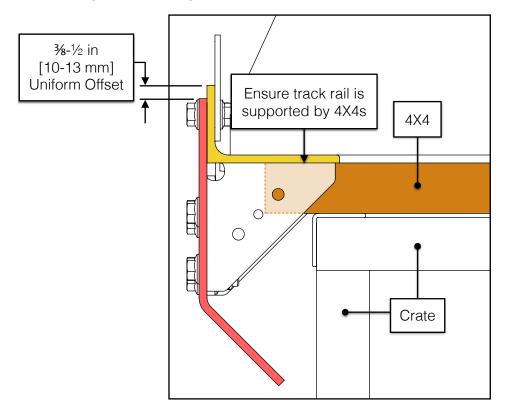

Install the components listed below to assist with correcting any side plate-to-rail offsets and gaps.

4x	M10 X 120 mm Socket Head Cap Screw	4	4x	Side Plate Alignment Jaw	
4x	Side Plate Alignment Diamond		4x	Swivel Jack	
4x	Side Plate Alignment Nut	- 1	1x 2x]	Swivel Jack Handle	

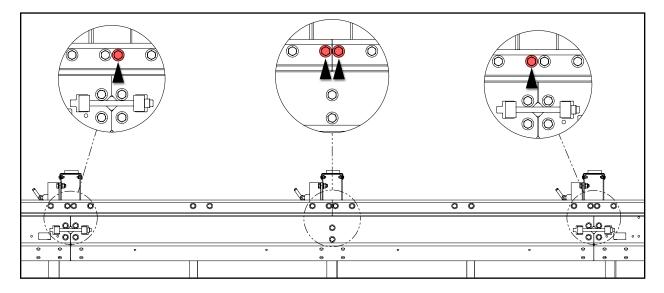

Before torquing the chassis bolts as shown on the following 3 pages, verify there is a  $\frac{3}{10}$  in [10-13 mm] offset between the top of the track rails and the top of the side plates. The offset must be uniform along the entire length of the trailer on both sides.

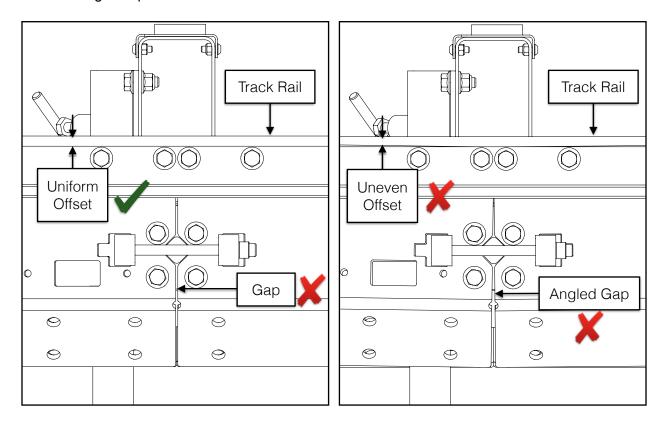

If the offset is not uniform, ensure the track is sitting on the 4X4s and not the crate. The side plates need to hang from the rails unobstructed, with only the force of gravity pulling them down.

Ensuring the side plate-to-rail offset is uniform, tighten and torque *only* the four (4) highlighted bolts securing the long side plate. Do this for both sides of the trailer.

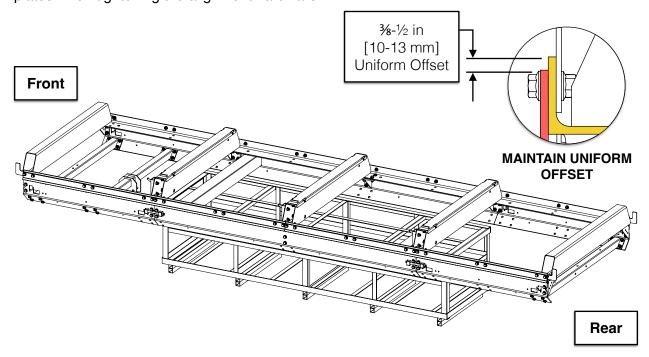

With the long side plate secured in place, note the gaps (if any) between the short side plates and the long side plates.

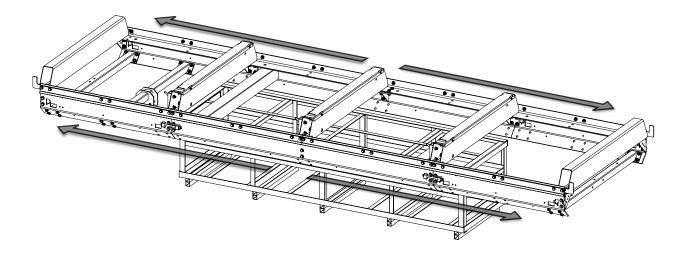

If there are gaps, they can be closed by tightening the M10 X 120 mm Socket Head Cap Screw. Tighten all four (4) M10 X 120 mm Socket Head Cap Screws to close the gaps.

Remember to maintain a uniform offset between the top of the track rails and the top of the side plates when tightening the alignment hardware.

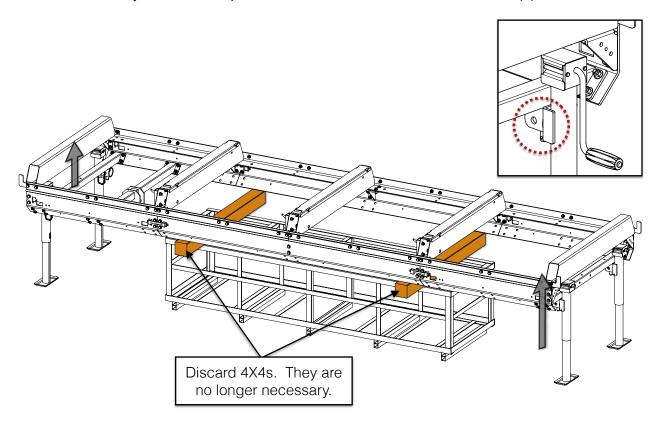

While maintaining a uniform side plate-to-rail offset, torque the remaining bolts per the table in section, **BOLT TORQUE SPECIFICATIONS**, starting from the centre and working towards the outer ends. Ensure the track is straight, level, and square during this procedure.

Position the swivel jack receivers under the front and rear *cross beams* as shown below and raise the assembly until the side plates are above the crate. Discard the two (2) 4X4s.

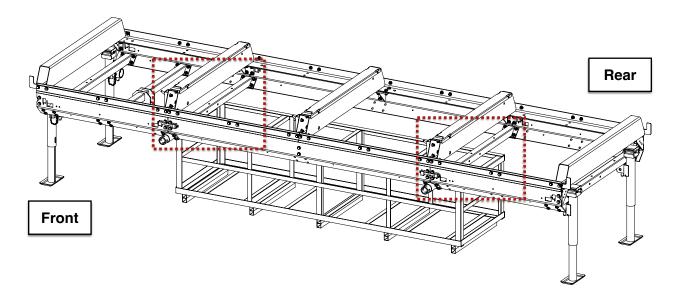

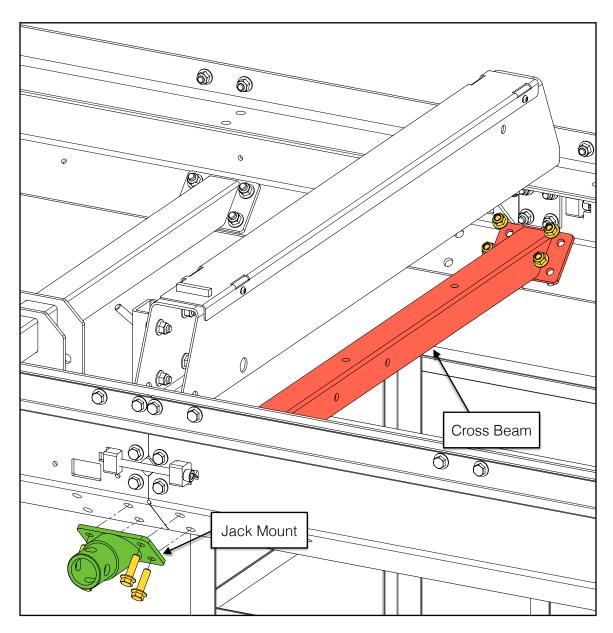

## 6. INNER CROSS BEAMS AND JACK MOUNTS

Using the hardware listed below, install the 2 remaining cross beams and 4 jack mounts. Torque all the bolts per the table in section *BOLT TORQUE SPECIFICATIONS*.

16x	M10 X 35 mm Flanged Hex Bolt	2x	Cross Beam	
16x	M10 Flanged Lock Nut	4x	Jack Mount	

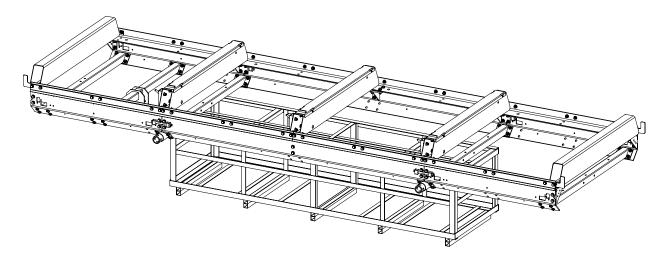

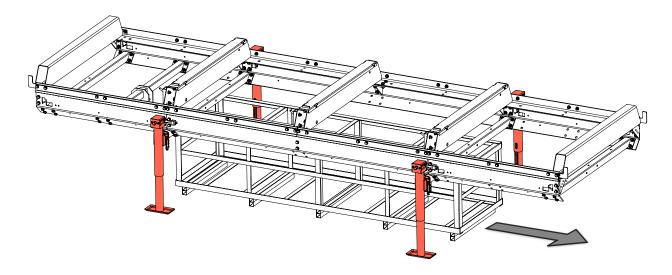

Next, lower the trailer until the cross beams are resting on the crate.

Slide the swivel jacks onto the jack mounts and secure them with the locking pins. Raise the jacks up to slide the crate out from under the trailer assembly. Place blocks of wood underneath each jack if necessary to achieve the required clearance.

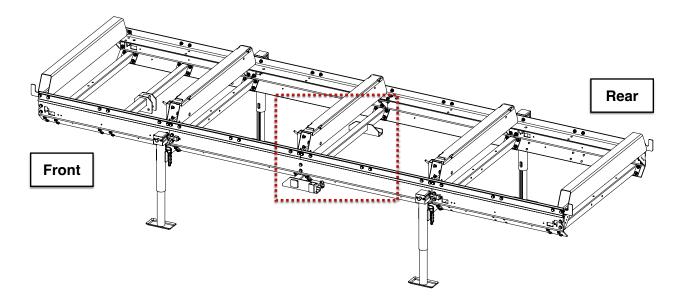

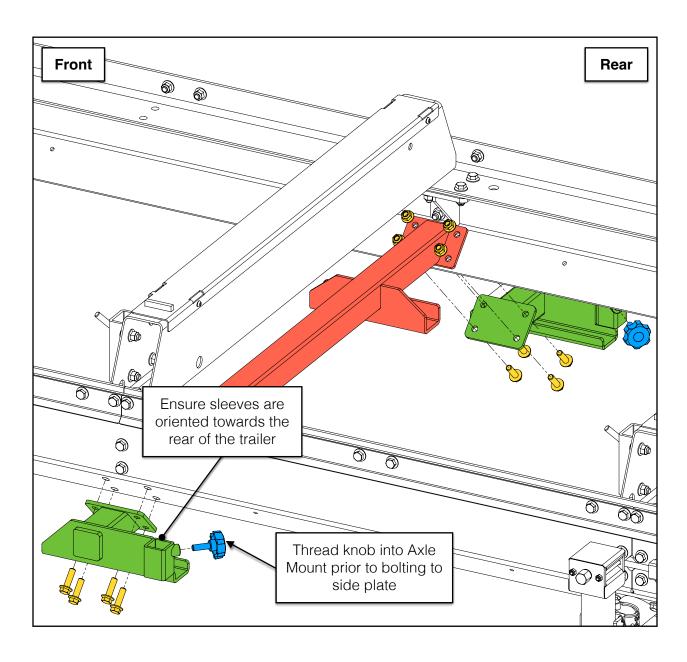

# 7. AXLE MOUNTS AND AXLE CROSS BEAM

Using the hardware listed below, install the axle mount cross beam and left/right axle mounts with fender adapter as shown. Tighten these bolts.

8x	M10 X 35 mm Flanged Hex Bolt	1x	Axle Mount w/ Fender Adapter [Left]	
8x	M10 Flanged Lock Nut	1x	Axle Mount w/ Fender Adapter [Right]	
2x	M10 X 30 mm Knob	1x	Axle Mount Cross Beam	

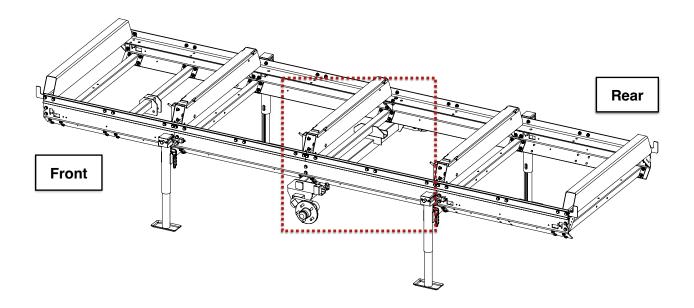

## 8. AXLE

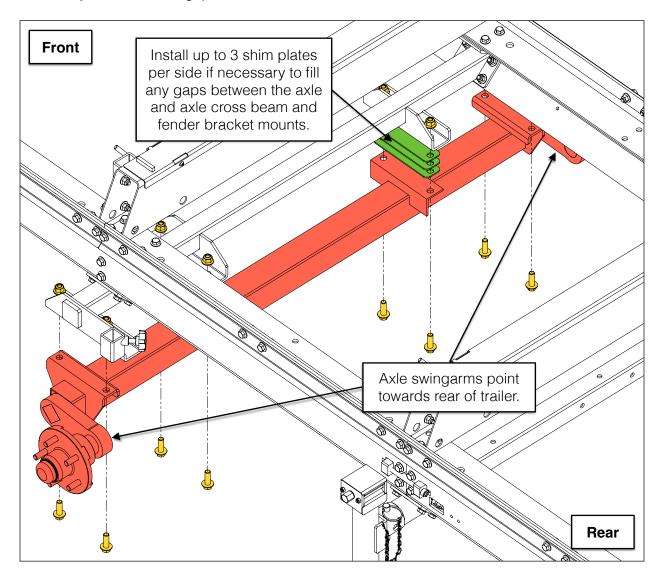

Using the hardware listed below, install the axle as shown on the next page. Do not torque these bolts until instructed in step, *WHEELS*.

8x	M12 X 35 mm Flanged Hex Bolt	1x	Axle	<b>37.52</b>
8x	M12 Flanged Lock Nut	[6x]	Axle Shim Plate	

Check for gaps between the axle and fender bracket mounts and axle cross beam. If there are any gaps, use axle shim plates fill the gaps to prevent any flexing of the axle. The shims are not necessary if there are no gaps.

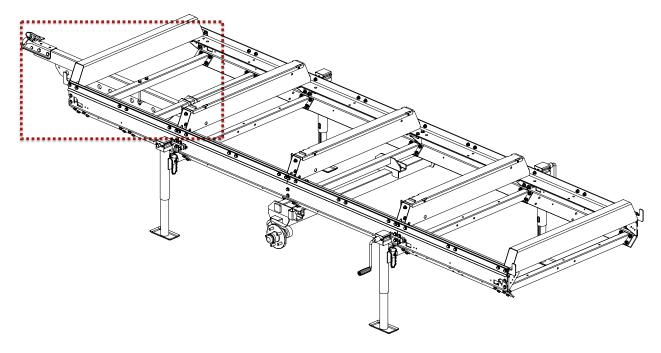

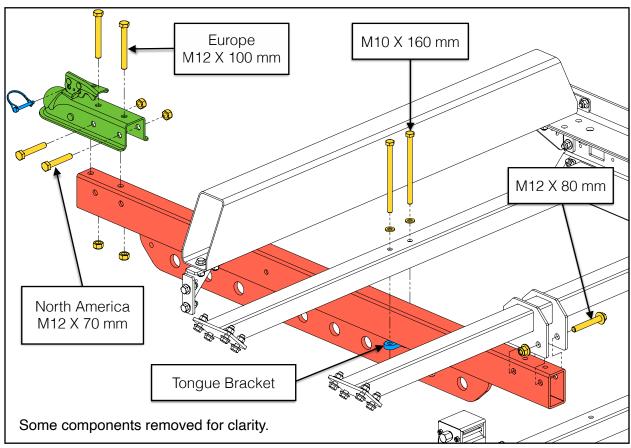

# 9. TONGUE AND COUPLER

Using the hardware listed below, install the trailer tongue and hitch coupler. Tighten these bolts.

2x	M12 X 100 mm Hex Bolt (Europe Only)		2x	M12 X 80 mm Flanged Hex Bolt	
2x	M12 X 70 mm Hex Bolt (North America)		2x	M12 Flanged Lock Nut	
2x	M12 Lock Nut		1x	Tongue	1.00000000
2x	M10 X 160 mm Hex Bolt		1x	Hitch Coupler	0000
2x	M10 Flat Washer			Tongue Bracket	
2x	M10 Lock Nut		1x	Locking Pin	

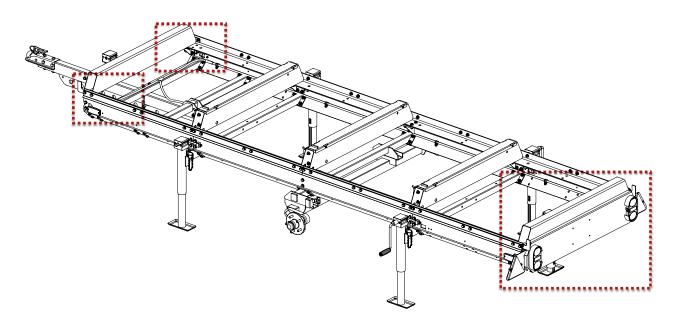

## 10. LIGHTING

Using the hardware listed below, install the taillight bracket and country appropriate wire harness. Use cable clamps to secure wire harness to side plates down right-side of trailer. Tighten all bolts.

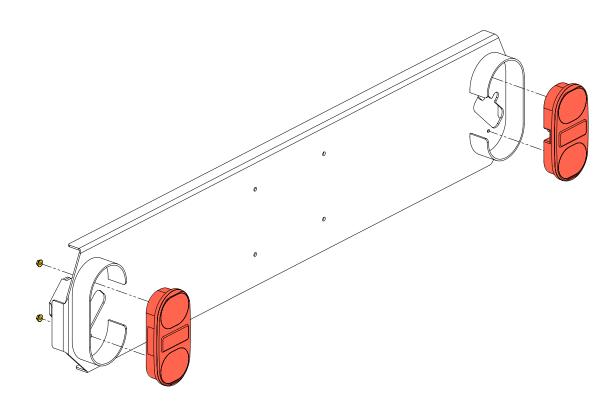

On the European (**EU**) version, install the 4 side reflectors, 2 front reflectors, and 2 rear reflector brackets and reflectors as shown on the following pages. There are no red/amber side lights on the European wire harness like the ones included with the North American (**NA**) version.

4x	M8 X 25 mm Flanged Hex Bolt	1x	Taillight Bracket	
4x	M8 Flanged Lock Nut	2x	Rear Reflector Bracket (EU Only)	
8x	M6 X 20 mm Hex Bolt	2x	Rear Reflector (EU Only)	
8x	M6 Flat Washer	4x	Side Reflector (EU Only)	
8x	M6 Lock Nut	2x	Front Reflector (EU Only)	
12x	M5 X 20 mm Pan Head Screw (8x NA Only)	8x	Cable Clamp	
14x	M5 Flanged Lock Nut (8x NA Only)	1x	Wire Harness (NA Only)	
		1x	Wire Harness (EU Only)	7'

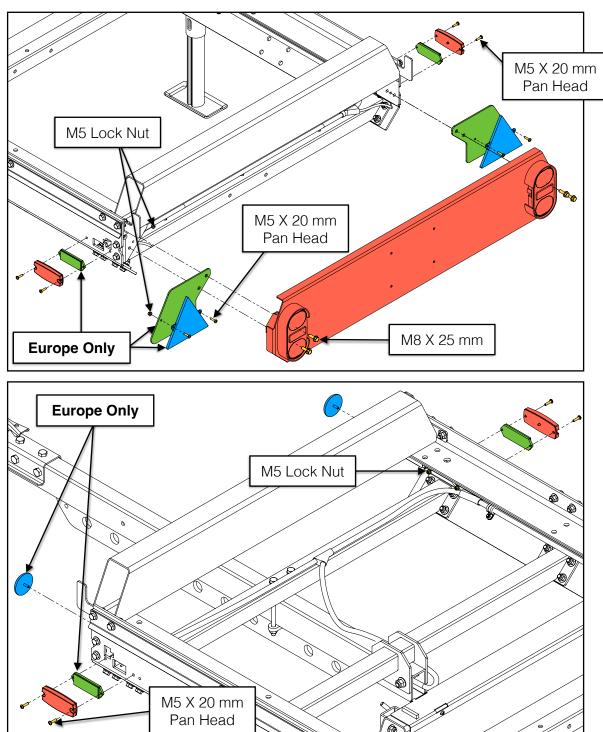

Secure tail lights to the taillight bracket using M5 flanged lock nuts before mounting taillight bracket to trailer.

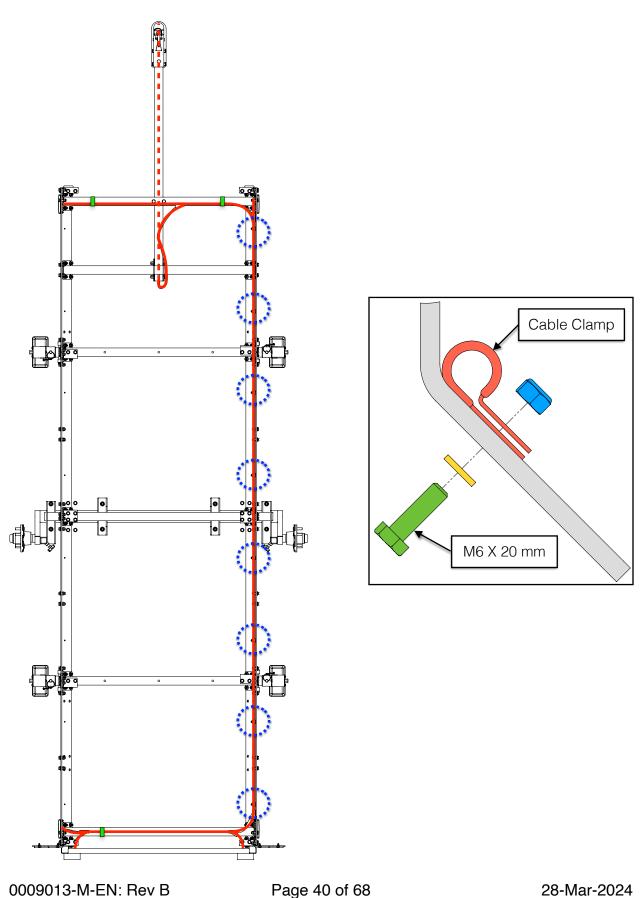

\*\*Note: Tail lights (North America and Europe) and side lights (North America only) are integral to the wire harness. They are shown exploded for assembly clarity.\*\*

There are 2 cable clamps per short side plate (2) and 4 per long side plate (1) for a total of 8. Cable clamps are installed down the right-hand side of the trailer only (locations circled blue). Use the M6 X 20 mm hex bolts, M6 washers, and M6 lock nuts as shown. This applies to both North American and European models. The wire harness routing is shown below, highlighted red. The excess wire harness should be cable tied to the cross beams, highlighted green.

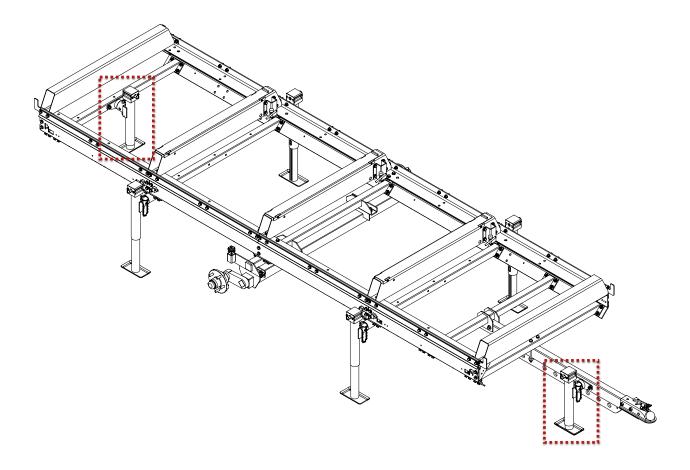

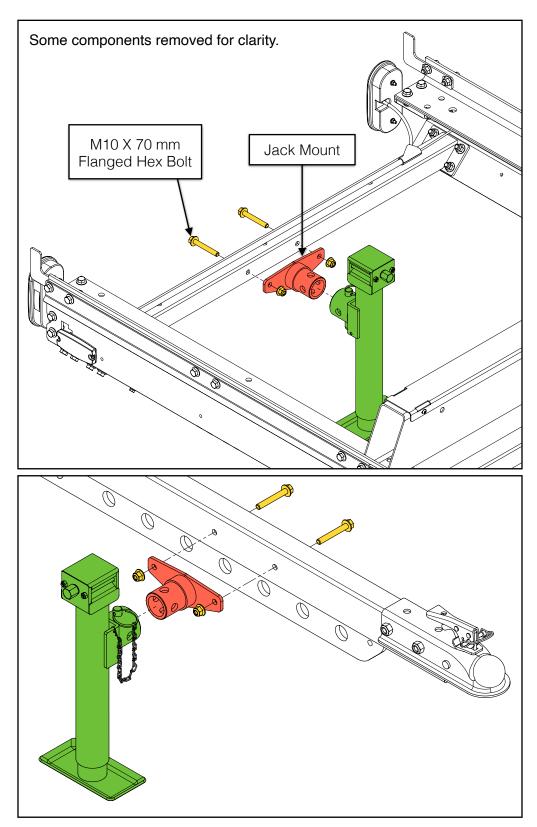

# 11. ADDITIONAL JACK STANDS

Using the hardware listed below, install the two (2) jack mounts and swivel jacks. Tighten these bolts.

4x	M10 X 70 mm Flanged Hex Bolt	2x	Jack Mount	
4x	M10 Flanged Lock Nut	2x	Swivel Jack	

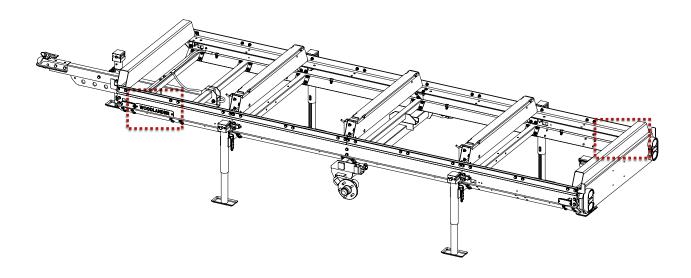

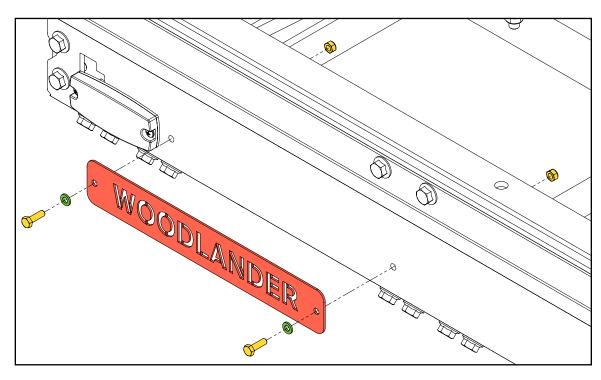

# 12. NAMEPLATES

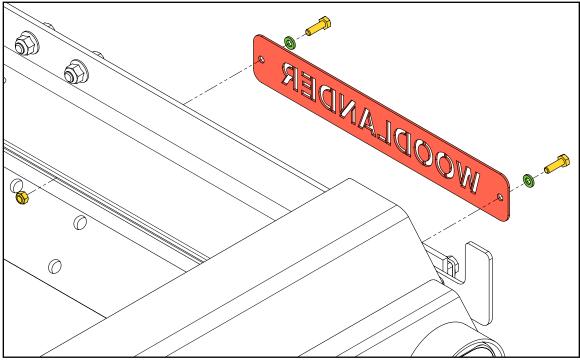

Using the hardware listed below, install the two (2) Woodlander nameplates as shown.

4x	M6 X 20 mm Hex Bolt	2x	Woodlander Nameplate	• WOODLANDER •
4x	M6 Flat Washer	4x	M6 Lock Nut	

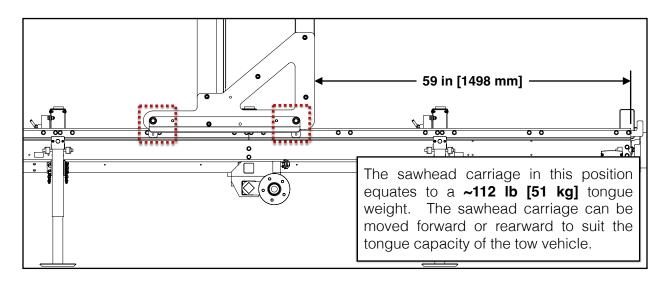

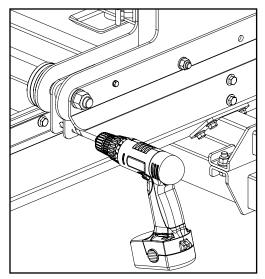

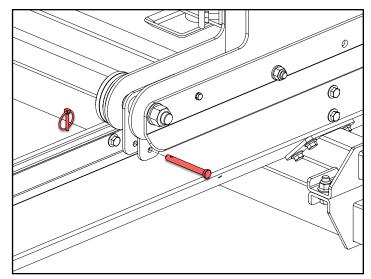

## 13. HEAD LOCK-DOWN PLATES

Place the assembled sawhead on the trailer.

Drill four (4) holes for the lock-down plates using the 10 mm [¾ in] drill bit provided with the Sawmill. Measure between 59 and 63 in [1498 and 1600 mm] from the rear edge of the track rail (*not* the carriage stop) to the rear post of the sawhead. Insert a locking pin into each hole as they are drilled. Secure each locking pin with a linch pin.

## **WARNING!**

Use cutting oil when drilling holes for lock-down brackets or else the heat generated could ruin the drill bit and produce a rough surface finish.

#### SAWHEAD CARRIAGE LOCK-DOWN POSITIONS

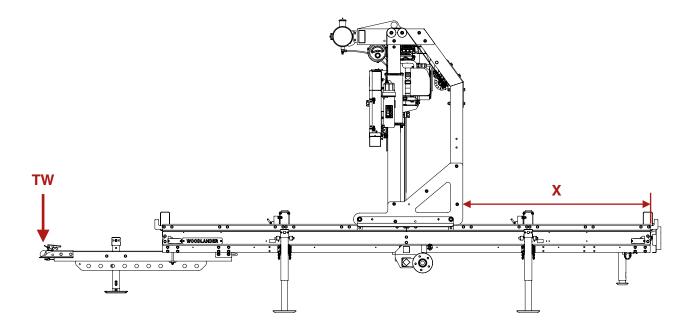

When deciding where to position the sawhead carriage, it is important to consider the tongue weight capacity of the tow vehicle. Lighter tongue weights are better suited for ATVs and smaller vehicles while heavier tongue weights work well with larger vehicles like pickup trucks.

\*\*Note: Tolerance on tongue weights is approx. ±15 lb [±7 kg] depending on how many accessories are installed (Lap Siding, Power Head, Log Loading Ramp Kit, Toolbox, Cant Hook, etc.)\*\*

Tongue Weight "TW" (lb) vs. Carriage Position Dim "X" (in)						
TW	122 lb*	162 lb	205 lb	246 lb	290 lb	
Dim X	60 in*	66 in	72 in	78 in	84 in	

Tongue Weight "TW" (kg) vs. Carriage Position Dim "X" (cm)						
TW	55 kg*	74 kg	93 kg	112 kg	132 kg	
Dim X	152 cm*	168 cm	183 cm	198 cm	213 cm	

<sup>\*</sup>Sawhead carriage centre of mass positioned over axles (highlighted yellow)

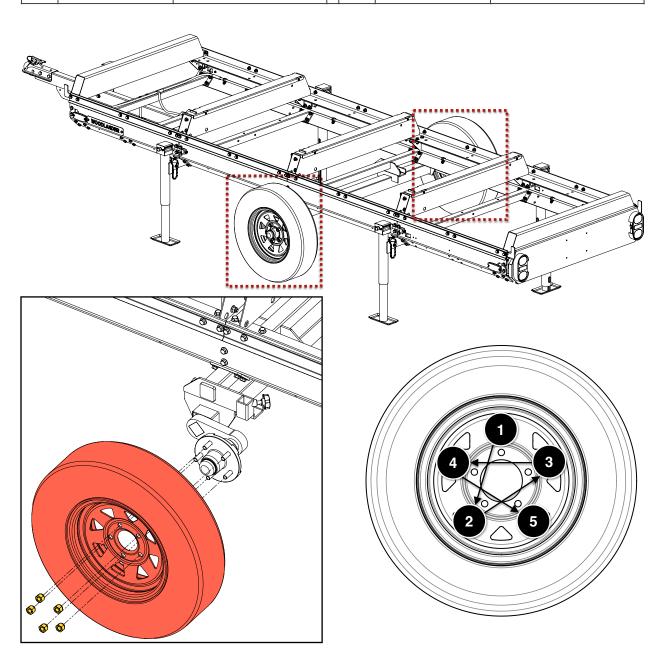

## **14. WHEELS**

Using the hardware listed below, install the tires on the axles. Using a torque wrench, torque the lug nuts to 80 ft•lb / 110 N•m following the pattern shown below.

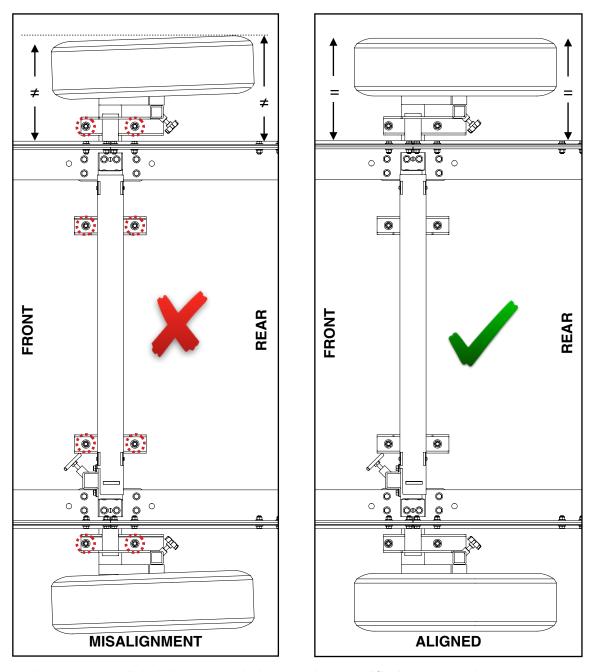

10x	1/2-20 Lug Nut		2x	175/80R13 Wheel	
-----	----------------	--	----	--------------------	--

#### WHEEL ALIGNMENT ADJUSTMENT

With the wheels installed, observe their alignment to the side plates. If the wheels are not parallel to the side plates, the axle position needs to be adjusted before the trailer can be towed behind a vehicle.

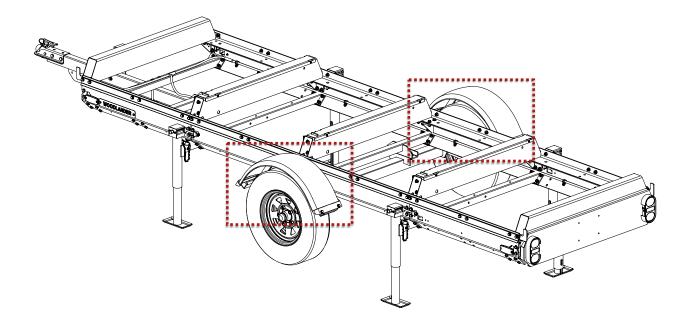

If the wheels are parallel, tighten the axle bolts to the **specified torque** and proceed to the next section. However, if the wheels are *not* parallel, loosen the four (4) M12 bolts on the affected axle(s). Rotate the axle assembly and wheel until the wheels are parallel. Then tighten the axle bolts to the **specified torque**.

## 15. FENDERS

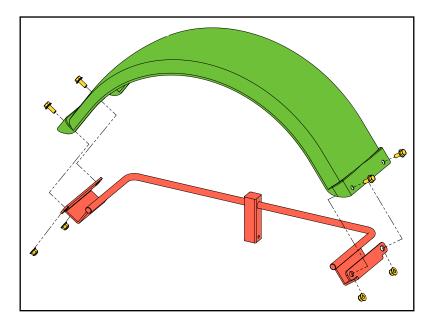

Using the hardware listed below, assemble the fenders to the fender brackets.

8x	M8 X 20 mm Flanged Hex Bolt	2x	Fender Bracket	
8x	M8 Flanged Lock Nut	2x	Fender	
		2x	Locking Pin	

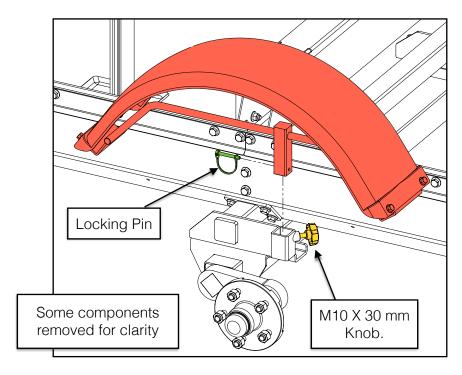

Fasten a metal fender to each fender bracket using four (4) M8 X 20 mm bolts and four (4) M8 flanged lock nuts. Fully tighten these bolts.

Slide the post on the fender bracket into the sleeve on the axle mount and insert the locking pin through the hole located at the bottom of the fender bracket post. Secure the fender/fender bracket sub-assembly using the M10 X 30 mm knob by threading it into the axle mount until tight.

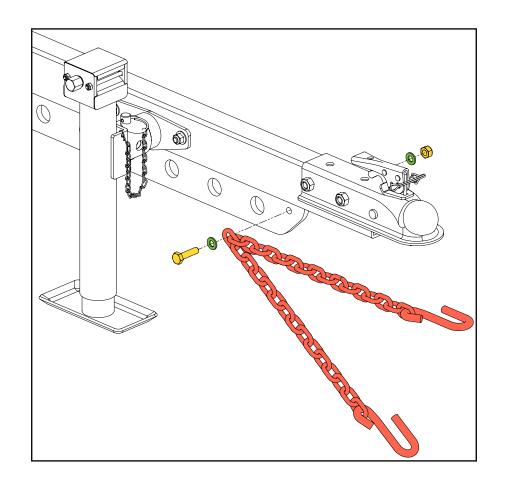

# **16. SAFETY CHAIN**

Using the hardware below, install the safety chain on the trailer tongue.

1x	M10 X 40 mm Hex Bolt	1x	Safety Chain	
2x	M10 Flat Washer			
1x	M10 Lock Nut			

## 17. CANT HOOK LEVERAGE PLATES

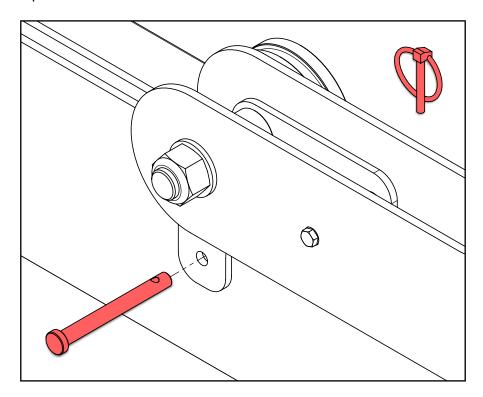

Using the hardware below, install the cant hook leverage plates on the cross beams.

Using	the nardware bei	ow, install the cant hook	ievera	ge plates on the c	ross beams.
6x	M10 X 70 mm Flanged Hex Bolt		2x	Cant Hook Leverage Plate	[000000]
6x	M10 Flanged Lock Nut				

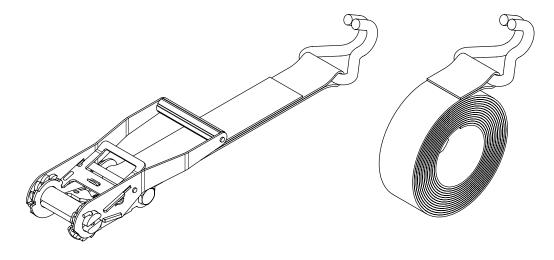

# OPERATION LOCKING-DOWN THE SAWMILL HEAD

When transporting the trailer, it is imperative that the sawmill head is locked-down securely to the trailer. Start by inserting the four (4) locking pins through the lock-down brackets and secure them with linch pins.

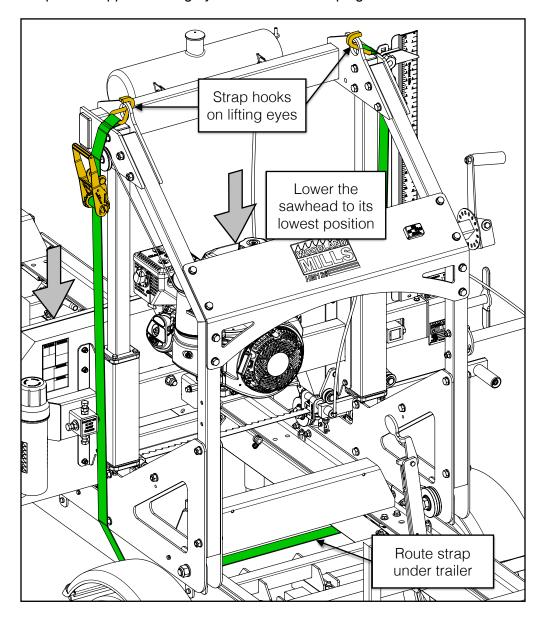

Next, route the included ratchet strap (shown below) around the sawmill and trailer to fully lock-down the sawmill head as shown on the next page.

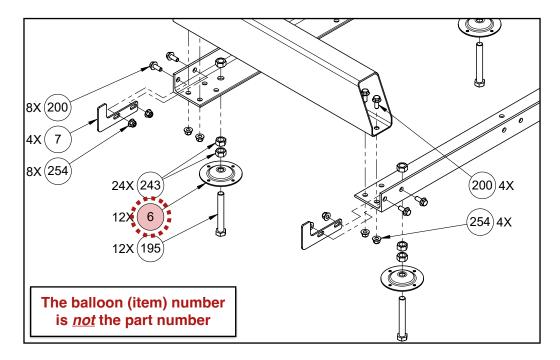

Lower the sawhead to its lowest position. Then insert the short strap hook into the cross beam lifting eye on one side of the sawmill, route the long strap down and under the bottom of the trailer, then up to the opposite lifting eye. Ratchet the strap tight until there is no slack.

## REPLACEMENT PARTS ORDERING

When ordering replacement parts, first locate the balloon number(s) from the appropriate *exploded assembly view* as shown in the example below:

Next, turn to the *Parts Lists* section and locate the balloon number in the "Item" column:

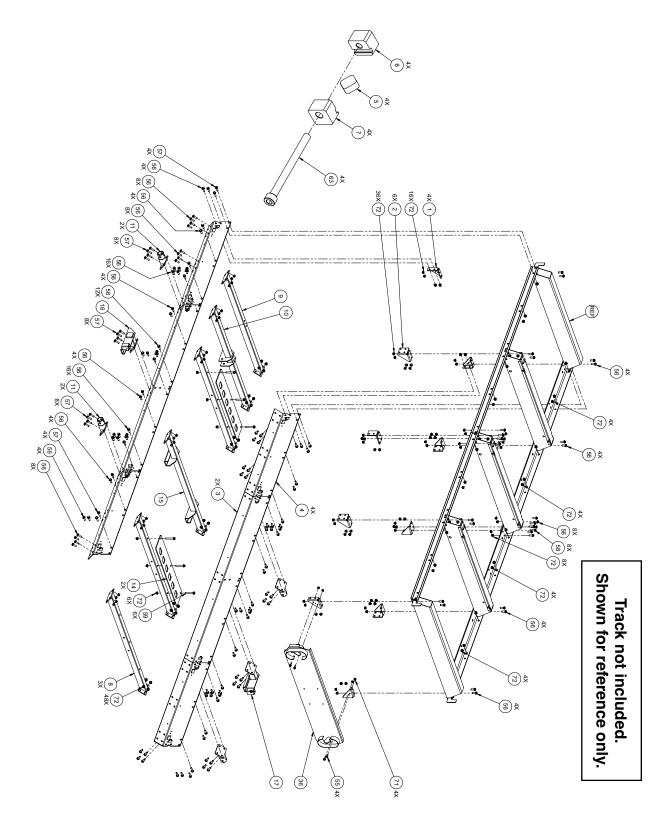

P	PARTS LIST						
		Qua	ntity				
Ite	em	14 hp	9.5 hp	Part No.	Description		
		4	4	0001073	TRACK RAIL, 58.5 mm TALL		
	2	2	2	0001075	LOG BUNK, END		
<b>[</b> ;	•	2	2	0001080	LOG BUNK, MID		
	4	1	1	0001084	LOG BUNK, CENTER		
1		2	2	0001072	REINFORCEMENT PLATE, 90 X 200 mm		
	6	-12	12	0001071	LEVELLING FOOT BASE		
	7	4	4	0001055	CARRIAGE STOP		
- 1	8	1	1	0001062	LOG CLAMP SHAFT AND BRACKET WELDMENT		

Record the part number (e.g. 0001071, HHB-MBM080FCJ, etc.) in the "Part No." column.

Contact Woodland Mills through the website or via phone/email. If possible, include the invoice or sales number from the purchased product so an associated account can be located. If the account has multiple addresses on file, please indicate to which address the replacement part(s) will be shipped.
